

SP 36.2 Architect-Engineer Services

Substantive changes made for the 3-31-06 revision:

1. Incorporates LBNL specific guidance currently in SI 36.2, "Simplified A-E Selection Procedures" dated February 1997.
2. Establishes that the Facilities Division head for Design and Construction will serve as the selection official for all Facilities Division A/E selections.
3. Adds to the description of multi-task subcontracts to specify that such subcontracts will contain a limit on the dollar value of individual tasks and that individual tasks may be negotiated on a labor hours basis.
4. References the new SF 330 rather than the obsolete SF 254.
5. Updates publications requirements to specify FedBizOps vs. CBD and adds that opportunities will be published in the California State Contracts Register as required by University of California.
6. Dollar value for publication of opportunities is raised from \$50,000 to \$100,000.
7. Dollar value for use of simplified procedures is raised from \$50,000 to \$100,000.
8. States preference for use of small businesses; requires that requirements of less than \$100,000 will be set aside for small business; and provides for award to a single small business source at dollar values less than \$100,000.
9. Clarifies that firms may be invited to submit SF 330's for an individual small (non-published) project rather than restricting consideration to an existing data base.
